

Clean Agent Protection for Critical and Irreplaceable Assets

A delicate, one-of-a-kind artifact or an entire data management center; each offers unique fire protection challenges. Our passion for protection drives us to create solutions to help you safeguard what matters most — your valued people, irreplaceable assets and critical systems.

Protect your property with the most environment-friendly solution

As destructive as fire can be, conventional agents also can damage valuable assets. ANSUL INERGEN Clean Agent Fire Suppression Systems protect your property from fire without causing collateral damage. INERGEN agent is non-synthetic, safe for people and composed of gases people breathe: nitrogen, argon and carbon dioxide. INERGEN agent also is engineered to be environmentally kind and warranted to comply with future environmental standards.

Choose a revolutionary fire protection agent

ANSUL SAPPHIRE Clean Agent Fire Suppression Systems are custom-engineered to quickly suppress fires and protect assets without causing harm to equipment, people or the environment. The SAPPHIRE system contains revolutionary 3M Novec 1230 fire protection fluid — a clear, colorless and odorless clean agent that fills protected spaces, absorbs heat better than water and quickly evaporates without harming people, valuable assets or the environment.

Safeguard your business with industry-leading detection and control

AUTOPULSE Intelligent Addressable Fire Alarm Systems and the AUTOPULSE Agent Releasing Control Panels offer state-of-the-art detection and control options to fit the configuration of the areas being protected.

AUTOPULSE Intelligent Addressable Fire Alarm System

The AUTOPULSE IQ-636X-2 and AUTOPULSE IQ-318 fire alarm control panels are designed with modularity and for ease of system planning. The control panels can be configured with just a few devices for small building applications or for a large campus or high-rise application.

AUTOPULSE Agent Releasing Control Panels

The AUTOPULSE 542R is a six-zone Agent Releasing Control Panel for single and dual hazard agent releasing applications. It provides reliable fire detection, signaling and protection for commercial, industrial and institutional buildings that require agent-based releasing. The AUTOPULSE Z-10 Suppression Release Panel provides conventional fire alarm control circuits and is equipped with the features required for a wide variety of single or dual hazard suppression release applications.

Have the power to respond if a fire starts

The full line of ANSUL portable fire extinguishers keeps you prepared for the first critical minutes of a fire. Protect your people and property with ANSUL fire extinguishers — powerful, portable and engineered to last.

ANSUL CLEANGUARD Fire Extinguishers

CLEANGUARD extinguishers include both standard and non-magnetic models. Clean agent extinguishers are rated for Class A, B and C fires, leave no residue, require no cleanup after discharge and will not damage materials, equipment or facilities.

ANSUL SENTRY Hand Portable Fire Extinguishers

For areas of your facility that do not require clean agent protection, the SENTRY line of portable dry chemical, carbon dioxide and water fire extinguishers are made to fight the widest range of industrial and commercial fires. Compact and lightweight, SENTRY stored pressure extinguishers come with a six-year limited warranty and are backed by the ANSUL worldwide distributor network.
